- English

### REFERENCES

- GitHub Link
- Portfolio
- Codeforces (Contest rating: 1207)

Highly motivated Software Engineer, adept in web developer, excels in problem-solving under pressure. Embraces challenges, prioritizes teamwork for success.

### EXPERIENCE

July 2023- Oct 2023

#### Full Stack Developer (Internship)

During my internship, I specialized in ASP.NET Core and domain-driven design (DDD), gaining hands-on experience in building robust, scalable applications.

### PROJECTS

#### Area Box (Graduate Project)

Project Idea: Create a dynamic web app for local connections, enabling users in the same city to engage, share experiences, and connect based on interests like education, sports, and games.

The technology used : ASP .NET CORE (MVC), Unit of work + Repository Pattern, MSSQL, C#, WebSocket, Web API, JavaScript, Ajax, Bootstrap, HTML, CSS

#### Hotel Reservation System

The Hotel Reservation System streamlines user bookings with flexible options. Admins can access vital site statistics, manage staff, and enhance the system by adding employees, rooms, and room types.

The technology used: ASP.NET CORE, DDD Pattern, JavaScript, MSSQL, C#, HTML, CSS

#### Portfolio Website

The technology used: JavaScript, HTML, CSS, Tailwind CSS

#### Chat App

Enables users to engage in real-time conversations, facilitating seamless communication and connection.

The technology used: Android Studio, Java, SQLite, JSON, XML

#### Email Notifier App

Upload email credentials, get real-time notifications for new emails, and reply/view content within the intuitive GUI.

The technology used: Python, sqlite3, tkinter

#### Discord Level Bot

Tracks user activity, assigns XP and points, enhances engagement with levels, leaderboards, and rewards, providing a dynamic ranking system.

The technology used: Node.js, Discord API, SQLite, JSON
